Creating value by improving lives...
Risks and opportunities

As entrepreneurs, our effectiveness in identifying and responding to opportunities and risks is key to our success.

At Naspers we acknowledge the importance of managing risks and opportunities as effectively as possible given our global footprint and diverse business models. As a group, we promote a culture in which robust risk acceptance processes and a systematic way to evaluate opportunities are seen as a driver of competitive advantage. These are integrated into our everyday decision-making and good governance practice.

How we manage and govern risk and consider opportunities

We seek to create value for our stakeholders by operating within the ambit of approval by our managing board and supporting governance committees (refer to governance structures on page 60 of the integrated annual report). We set relevant tolerance levels for each significant risk individually and manage our business within these parameters. We understand that certain risks may have multiple consequences and that a certain consequence may materialise from different types of risk. The same applies to opportunities.

We require our businesses to apply a methodical approach to governance, risk and compliance. The six capitals transformation model is considered useful to analyse risks and opportunities as we aim to continuously reduce our impact and stimulate positive capital transformation.

For management at group and subsidiary level, our policies provide direction, scope and ambit to apply practices and principles to manage risk and opportunity, both operationally and strategically. Key risks are reported to segmental risk committees who in turn will communicate to the board. The risk committee assists the board to ensure that risk is governed in a way that supports the group in setting and achieving its strategic objectives.

Stakeholder relationship management, both internal and external, forms an integral part of our risk management processes. We are aware of the risks associated with outsourced services and third-party applications and continually look at better ways to manage our relationships with suppliers.

Our legal compliance office provides support with the help of in-country legal teams and where required, we consult specialists when contracting with potential suppliers and service providers.

We are cautious around privacy requirements for both internal and external stakeholders as well as our customers.

Drawing on best practice

Our risk management framework, system and processes draw on internationally recognised best business practice and frameworks. We promote the sharing of knowledge and learning from any incidents and good management practice between businesses within the group.

Responsibility

Management and the board are accountable for the choices and decisions we make, how we execute these and for delivering a commensurate reward — in value in its broadest definition — within the parameters of the risk profile the board deems acceptable.

As Naspers continues to evolve and invest in companies that operate at different maturity levels, risk tolerance levels are set top-down and management of the business segments is accountable to manage risk within these levels.

The responsibility for managing risk lies with the owner of risk; in most cases operational management, assisted by the finance function and, where considered useful in our businesses, specialised risk management and risk support functions.

Group internal audit and risk support assess the effectiveness of the system of risk management and internal control and may provide assistance and guidance to the business.

At least semi-annually, our external auditor provides assurance over the reliability of the financial information that we publish.

Our risk analysis focuses on the impact of risk on our objectives without losing sight of any opportunities that may arise.

For risks we are not prepared to accept, we act to reduce our vulnerability.

Depending on the importance of the risk in relation to tolerance levels, active management of the risk takes various forms and varies in extent.

ANALYSING AND RESPONDING TO DIFFERENT RISKS

Our businesses are expected to apply a defined, structured approach to identifying, assessing, analysing and responding to risk and opportunities within tolerance levels set by the board.

1. Controls to prevent and detect risk

We operate or implement enhanced control and monitoring measures that either prevent or detect the materialisation of a risk at the earliest stage.

2. Spread risk

We take measures that mitigate any material consequences and, on a portfolio basis, we spread uncorrelated risks.

3. Share or transfer risk

Where we can, we explore ways to share or transfer risk.

4. Mitigate risk

We run adequate insurance programmes to mitigate the risk of sudden losses caused by the materialisation of insurable risk.

5. Exit strategy

Wherever we find a risk outside acceptable levels, we consider ways to avoid the risk altogether; for example by entering into an exit strategy.

Identify → Assess → Analyse → Respond

ANALYSING AND RESPONDING TO DIFFERENT RISKS

Increasing risk

Exit strategy
Risks and opportunities continued

Our objective-driven dynamic approach

Our programmes are aimed to mitigate risk within levels we deem acceptable and to also stimulate identification of opportunities to either improve our performance or strengthen our potential.

Our overarching aim is to transform our capitals for a net positive impact. This approach gives rise to various risks, specifically over-using any of the six capitals (higher input than intended) or under-producing (lower output than intended). We may also identify opportunities for greater efficiency (lower input than anticipated) or more effective production (higher output than anticipated) in any of the capitals and therefore, exceed against our original objectives. This can translate into wasted resources. Creating sustainable value is a continual process of balancing available resources for optimal benefit to our entire stakeholder base.

For our stakeholders, opportunities and risks matter most where they have the greatest impact on value (in its broadest sense). Therefore, we select opportunities and assess, manage and accept risks primarily on the basis of their potential impact on determined value drivers.

Key areas of focus in the year

Capital reallocation
During the year we have executed and/or announced a number of major transactions that we see as transformational. All these implied (and still imply) careful weighing up of significant risk and opportunity and required significant management attention.

Main examples are:
- reinforcing our balance sheet for major transactions that we see as transformational.
- our announcement to pursue unbundling our US$3.8bn Video Entertainment segment, thereby effectively creating a 100% online consumer internet company.
- a number of acquisitions in Payments and Fintech, and
- our US$716m investment and further capital injections and commitments in our food business, Swiggy.

We have furthermore redeployed significant amounts of capital to accelerate growth of our core businesses, such as:
- Classifieds: enlarging our interest in Avito and investing in letgo (respectively US$1.16bn and US$1.98bn)
- a number of acquisitions in Payments and Fintech, and
- our US$716m investment and further capital injections and commitments in our food business, Swiggy.

Platform, technology and architecture optimisation
For our core businesses, improving platforms and architecture to enhance customer experience and support scalability and security has been a leading theme.

This entails developing and introducing product improvements (including application of machine learning (ML) and artificial intelligence (AI) solutions), integration and consolidation of existing platforms and effect operational improvements by transitioning applications to cloud environments.

Cybersecurity and data privacy
Our efforts to continuously optimise our capital allocation also means that we, more often than not, reject opportunities and/or deals that we deem either not sufficiently attractive or outside risk parameters we feel comfortable with.

As in the previous year, our cybersecurity and resilience has remained a major area of focus with a specific eye on data privacy, which has gained importance in the eyes of both our stakeholders and regulators worldwide. We are committed to protect sensitive data and operate our businesses such that we are able to detect and respond promptly to any attempts to breach data or abuse our systems: we understand that being able to do so is to manage a number of related risks. This may have a positive impact on our relationship with customers and other stakeholders.

Talent management
The talent that we need to execute on our strategic ambitions is scarce and highly sought after. Increasingly, talent shortage is a risk. We are addressing this issue by investing in HR support, enhancing our recruitment and retention strategies and by bettering our learning and development offering for all employees, eg through our MyAcademy learning platform. We also increasingly encourage businesses to consider and address topics of diversity (including gender equality) and inclusion.

Future focus areas
For the near future we do not foresee the key focus areas becoming less relevant. In addition, we expect that the following topics will demand growing attention:

Data-driven technologies
Our businesses are placing greater emphasis on opportunities to enhance our services and customer experience through the development and deployment of data-driven technologies such as ML.

We need to understand and effectively manage the emerging risks that present themselves as a result. Such risks may relate to privacy and compliance in connection with the use of data, and also the control over and consequences of automated decisionmaking.

Sustainability
Through our policies and governance structures we put our commitment to ethical and sustainable entrepreneurship into practice. We also realise that the communities we serve and our various stakeholders take a growing interest in the sustainability of our operations and the impact of our corporate citizenship. We value our reputation and are fully aware of the importance of our social and relationship capital.

We understand that reputational risks relating to our commitment predominantly come from a misalignment of our values or a deviation from our desired business culture, which, in a group as diverse and geographically spread as ours, naturally is a challenge to eliminate.

Throughout our group we will continue to emphasise the importance of ethical and responsible behaviour and undertake various initiatives to ensure awareness of, and adherence to, our code of business ethics and conduct, while promoting a culture of integrated thinking in everything we do.

</tr>
</thead>
</table>
| **Financial**   | Invest in countries where we operate by creating business for local suppliers, employing people and giving governments their dues via taxes and levies. | • Global and political market disruptions.  
• Failing to compete effectively.  
• Unexpected changes in the value of our assets.  
• Insufficient funding to realise our ambitions.  
• Currency exchange fluctuations, and navigating exchange control.  
• Credit risk.  
• Counterparty risk.  
• Fraud-related crimes and theft.  
• Financial misstatement and/or failure to accurately disclose in our public reports. | • We monitor global and political developments and adjust quickly.  
• We allocate significant resources to analysing market developments and invest in early-stage opportunities to stay ahead.  
• We have a fully funded three-year plan with room for M&A, and we manage the balance sheet conservatively.  
• We act early to ensure we have the funds and resources to realise our ambitions.  
• We invest funds and manage our cash in accordance with our group treasury policy which, inter alia, sets minimum standards to mitigate risk of counterparty default.  
• We operate an effective internal control environment and the audit committee oversees the effectiveness of combined assurance. | • Decreasing as a result of the unbundling of MultiChoice Group (which had a different risk profile) and our focus on consumer internet.  
• Key risks that have decreased are driven by political, counterparty, currency and compliance risks (including tax). |

| **Human**       | Attract and retain high-calibre individuals to execute on strategy and build sustainable businesses.  
• Back entrepreneurs and local teams by providing them with resources to accelerate growth.  
• Provide our employees with focused career development and training.  
• Foster a safe and healthy working environment where people feel cared for, heard and supported in their ambitions.  
• Reinforce the leadership pipeline and accelerate the growth of top talent.  
• Support the ongoing development and growth of our businesses and equip our people with new skills for tomorrow.  
• Develop core business skills in e-commerce and media.  
• Be fair and responsible in our remuneration practices and have a pay-for-performance remuneration strategy.  
• Encourage diversity in our teams and thinking, and build inclusive workplaces. Our employment philosophy is founded on promoting equality and preventing unfair discrimination.  
• Be complaint with relevant labour laws in the countries where we operate. | • Failing to attract and retain talent to execute strategy.  
• Non-compliance with applicable health and safety, and labour and economic empowerment laws.  
• Inability of existing employees to adapt promptly to changes in market and innovation and adapt business strategies accordingly.  
• Unfair treatment and remuneration.  
• Inadequate development of employees. | • Strategies to develop employees and attract talent to meet the business’s objectives, including learning and development initiatives (through MyAcademy that is online and classroom-based), training, and employee wellness initiatives across the group.  
• A global talent function that focuses on attracting, retaining, developing and engaging people with key skills and rewarding exceptional performance.  
• Our legal compliance programme ensures compliance with applicable occupational health and safety, labour, economic empowerment, transformation and diversity laws.  
• Human resource policies and procedures to address talent attraction, management and retention, development, succession planning, fair and responsible remuneration, working conditions, grievance procedures and diversity.  
• Initiatives to enhance our human capital include diversity and inclusion, gender equality and leadership development. | • Increasing as a result of shortages of necessary talent. |

<td></td>
</tr>
</tbody>
</table>

### Natural

We acknowledge that we are required to act in an environmentally responsible way. As an internet and entertainment group, Naspers has a relatively low impact on natural resources. Our businesses consider the extent to which natural capital may significantly affect current or future operations; trigger legal or regulatory processes or fees, such as emission fees; have a financial impact; eg on insurance conditions; and affect company image or relationships with stakeholders, eg changing customer and employee preferences. Each business’s response to mitigate key risks and pursue opportunities will differ depending on the unique risks and opportunities in their operating environments.
